

Tabletop tracking marker · black square = 8 cm

Marker 1: OUR PLANE

the plane with the system, lights and IMU

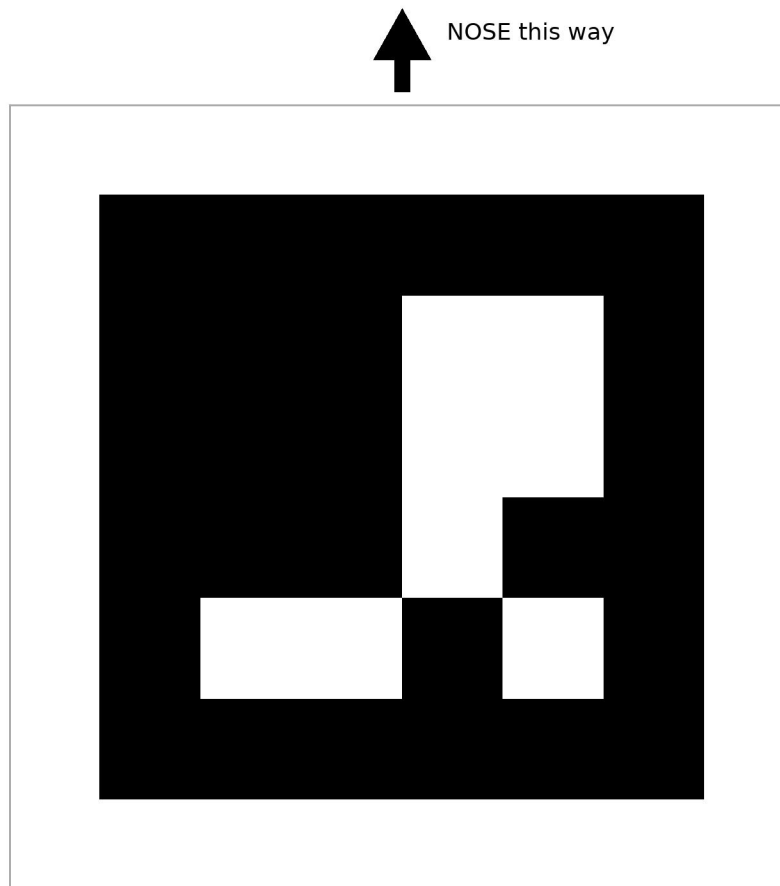

How to mount

1. Cut around the gray outline. Keep the white border: the camera needs it.
2. Tape it flat on top of the plane with the arrow toward the nose.
3. Matte paper; tape only the edges (shiny tape causes glare).
4. Start with the planes flat on the table, then click Zero table.

This line must measure 10 cm. If it does not, print again at 100% (actual size).

Tabletop tracking marker · black square = 8 cm

Marker 2: OTHER PLANE

no system: its pilot reads our lights

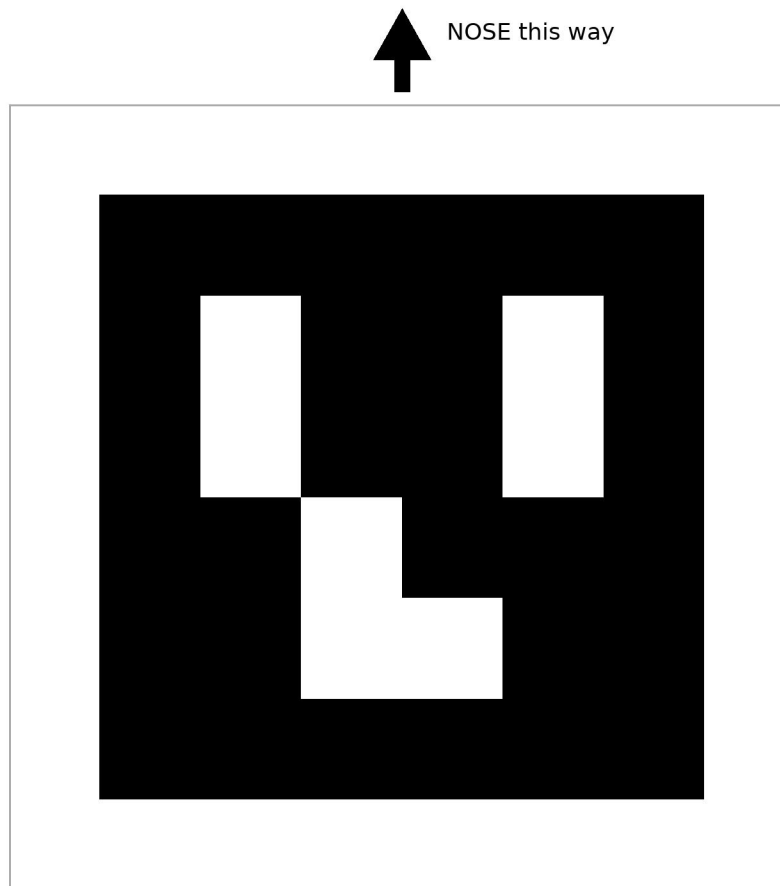

How to mount

1. Cut around the gray outline. Keep the white border: the camera needs it.
2. Tape it flat on top of the plane with the arrow toward the nose.
3. Matte paper; tape only the edges (shiny tape causes glare).
4. Start with the planes flat on the table, then click Zero table.

This line must measure 10 cm. If it does not, print again at 100% (actual size).

Tabletop tracking marker · black square = 8 cm

Marker 3: SECOND OTHER PLANE

optional: a third aircraft

How to mount

1. Cut around the gray outline. Keep the white border: the camera needs it.
2. Tape it flat on top of the plane with the arrow toward the nose.
3. Matte paper; tape only the edges (shiny tape causes glare).
4. Start with the planes flat on the table, then click Zero table.

This line must measure 10 cm. If it does not, print again at 100% (actual size).
